The VEXO8 is a high-output loudspeaker cabinet, featuring an 8" high efficiency mid/low range driver and 1" compression driver fitted with a 100° x 80° coverage horn, providing a powerful and detailed sound in a compact cabinet.

The exceptional accuracy and clarity coming from this compact cabinet is recommended to be extended with a complementary bass cabinet adding the punchy & deep bass, resulting in a stunning sound over the entire frequency range.

Their elegant enclosure allows them to be used in modern & trendy installation applications such as bars and nightclubs, while their functional features make them perfect for use in compact mobile systems.

It delivers a powerful sound with an RMS rating of 175 Watt, and a maximum of 350 Watt. Compression driver overload protection is provided through an internal limiting circuit.

Connections are made using two speaker connectors allowing linkthrough to other cabinets. Mounting in both horizontal and vertical direction is possible with the included wall bracket and the rotatable horn. An optional 35 mm pole adapter can be installed when used in mobile applications.

The VEXO8 loudspeaker is available in Black (/B) or White (/W).
