

► Features

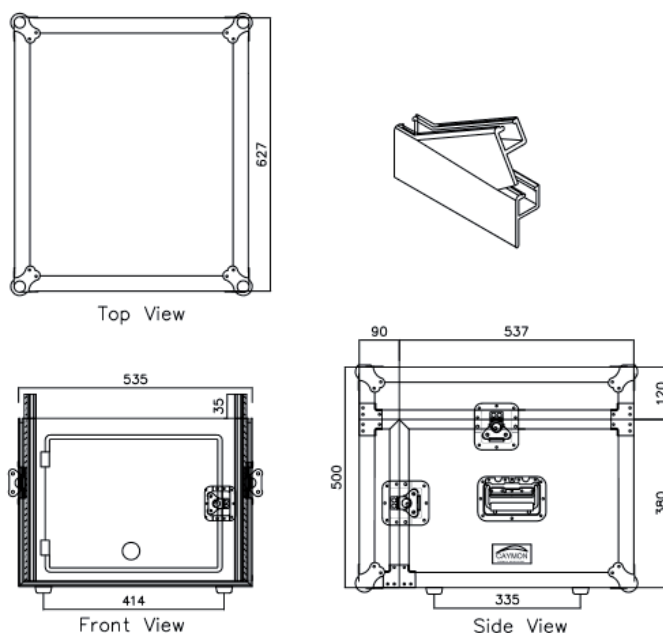

- Integrated flip handles
- Professional Butterfly latches
- Black scratch-resistant coating
- Aluminium finishing corners
- Removable front and top lid
- Integrated door at the back

► Description

The FCC06 is a professional flightcase with removable front and top lid and an integrated door at the back. It is made out of high quality 9 mm multiplex with black scratch-resistant coating and is equipped with sturdy integrated flip handles and professional butterfly latches. It thanks its strength and durability to the 3 mm thick aluminium finishing profiles and extra galvanized metal reinforcements on every corner. The flightcase can store up to 6 units.
